Parth Shingane

+91-8999267441 | parthshingane27@gmail.com | Pune, India | LinkedIn | GitHub

EDUCATION

MIT Academy of Engineering, Pune **2024 – 2028**
B.Tech in Computer Science and Engineering *CGPA: 7.93 / 10.00 | Latest SGPA: 8.27 / 10.00*

TECHNICAL SKILLS

- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Design(OOPs), Operating Systems, DBMS, Computer Networks
- **Programming Languages:** Java, C++, Python, JavaScript, SQL
- **Backend & Web Development:** Node.js, React.js, Next.js, FastAPI, Tailwind CSS
- **Cloud, Databases & Tools:** MongoDB, MySQL, Docker, Git, GitHub
- **ML/AI & DataScience:** Machine Learning (Regression, Classification, Clustering), NLP, Model Training & Evaluation, Scikit-learn, PyTorch, Pandas, NumPy, RAG, OKF

KEY PROJECTS

SafeDrain – Sanitation Worker Safety & Monitoring System | Github

– Developed a safety monitoring platform for sanitation workers, integrating real-time hazard monitoring, emergency alerts, and centralized incident tracking.
– Implemented machine learning-based anomaly detection using Isolation Forest and Random Forest to identify potential workplace hazards and support proactive risk assessment.
– **Tech Stack:** React.js, Python, FastAPI, MongoDB, Machine Learning, IoT.

Flipkart GRIDLOCK 2.0 – Traffic Demand Prediction | Github

– Engineered a machine learning pipeline for traffic demand prediction using geospatial, temporal, and environmental features.
– Optimized predictive performance through feature engineering, GroupKFold validation, and LightGBM-CatBoost ensemble blending, achieving a **92.695** leaderboard score.
– **Tech Stack:** Python, Pandas, NumPy, LightGBM, CatBoost, Scikit-learn.

National Weather Big Data Analytics Platform | Github

PS 26069 · Weather Intelligence & Analytics

– Integrated weather-data sources to support centralized ingestion, validation, and analysis of forecasts, rainfall, warnings, and nowcasts.
– Designed an interactive geospatial dashboard for location-based weather visualization, event filtering, and monitoring of weather-related reports.
– Applied data analytics and ML techniques to support anomaly detection, trend analysis, and weather-event verification.
– **Tech Stack:** Python, FastAPI, React, MongoDB, Pandas, IMD APIs, Machine Learning

PROBLEM SOLVING

- **LeetCode:** Solved **100+** problems covering Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs, Searching, Sorting, and Recursion.
- **CodeChef: 1-Star** rated coder, actively practicing problem-solving and algorithmic challenges through competitive programming.

ADDITIONAL INFORMATION

- **Achievement:** Participated in national-level hackathons, advancing to the semi-finals and developing innovative, technology-driven solutions to real-world problems.
- **Language:** English, Marathi, Hindi
- **Extra curriculum:**
  1. State-Level Handball & Kabaddi Player
  2. Tech Member of Girl Script Club (MITAOE)
  3. National-Level Hackathon Finalist (SAMVED)
  4. Active participant in technical projects and team-based competitions
